Galaxy Neuron

User Guide

September 13, 2024
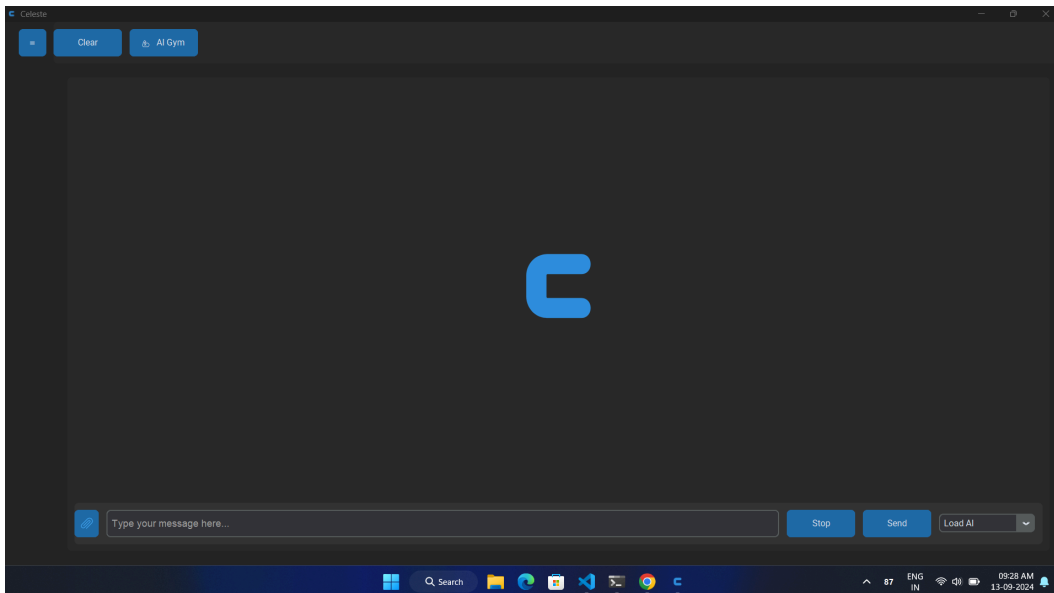

Note: Celeste is a free research preview. May contain bugs.

Contents
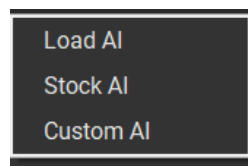

Overview

Celeste, an AI that can answer any sort of question. Celeste, similar to most AI assistants out there, stands out with the AI Gym feature. AI Gym is a feature that allows users to customize an AI according to their likes and preferences (with security checks). Works like any other chatbot.

Definitions

Stock AI : By definition, stock AI is the default AI which has all-round capabilities and is generalistic.

Custom AI : On the other hand, custom AI is the one type of AI that you can customize based on your preferences. Preferences can be like sports, research, music etc.

Note : Load AI is only a placeholder to select an AI of choice.
